

📍 Kraków

Kacper Książek

FULL-STACK DEVELOPER

I specialize in the **typescript**. As a developer, I prioritize both **UX** and **DX**. The desire to create both a good product and code motivates me to constantly learn and work hard to continuously improve my skills. In addition to web applications, I am interested in **artificial intelligence** and the contemporary development of technology. I regularly participate in **hackathons**, where I can test my skills in a dynamic environment and learn a lot.

Recent projects

◆ IAESTE Caseweek

November 2023 - present

Within the IAESTE student association, I contributed to the IAESTE Caseweek, a series of engineering workshops.

Technologies: react, typescript, mui, docker, spring, swagger, figma, seo, rest api, PostgreSQL, HQL, jUnit
